

ELEVATING OCCUPATIONAL HEALTH, HYGIENE, AND SAFETY: A HUMAN AND ORGANIZATIONAL PERFORMANCE BASED APPROACH FOR EXCELLENCE

Learning Outcomes

- **Comprehensive HOP Fundamentals:** Understand the core principles of HOP and its direct relevance to occupational health, hygiene, and safety programs.
- **Cultivating a Holistic Safety Culture:** Discover strategies to foster a culture that not only prioritizes safety but also emphasizes health and hygiene, including effective leadership, employee engagement, and open communication.
- **Proactive Risk Mitigation:** Explore HOP's integration of risk assessment and management into safety programs, ensuring a healthier and safer work environment.
- **Incident Learning and Continuous Improvement:** Learn HOP's innovative incident investigation techniques that encourage learning and drive continuous improvement across health, hygiene, and safety practices.
- **Measuring Success Holistically:** Implement leading indicators to monitor and enhance the effectiveness of your integrated occupational health, hygiene, and safety programs.

Abstract

We invite you to participate in our workshop to explore the application of Human and Organizational Performance (HOP) focused on occupational health, hygiene, and safety programs. In today's rapidly evolving workplaces, the integration of health and hygiene with safety is paramount, and HOP offers a comprehensive framework for achieving excellence in all three domains.

Our workshop will provide a deep dive into HOP principles and methodologies, empowering attendees to elevate their occupational health, hygiene, and safety initiatives. Embracing the interconnectedness of human behavior, organizational culture, and systems, we will delve into how HOP can drive transformative change in your workplace.

Agenda
